

MONTH IN PICTURES

MAY 2019

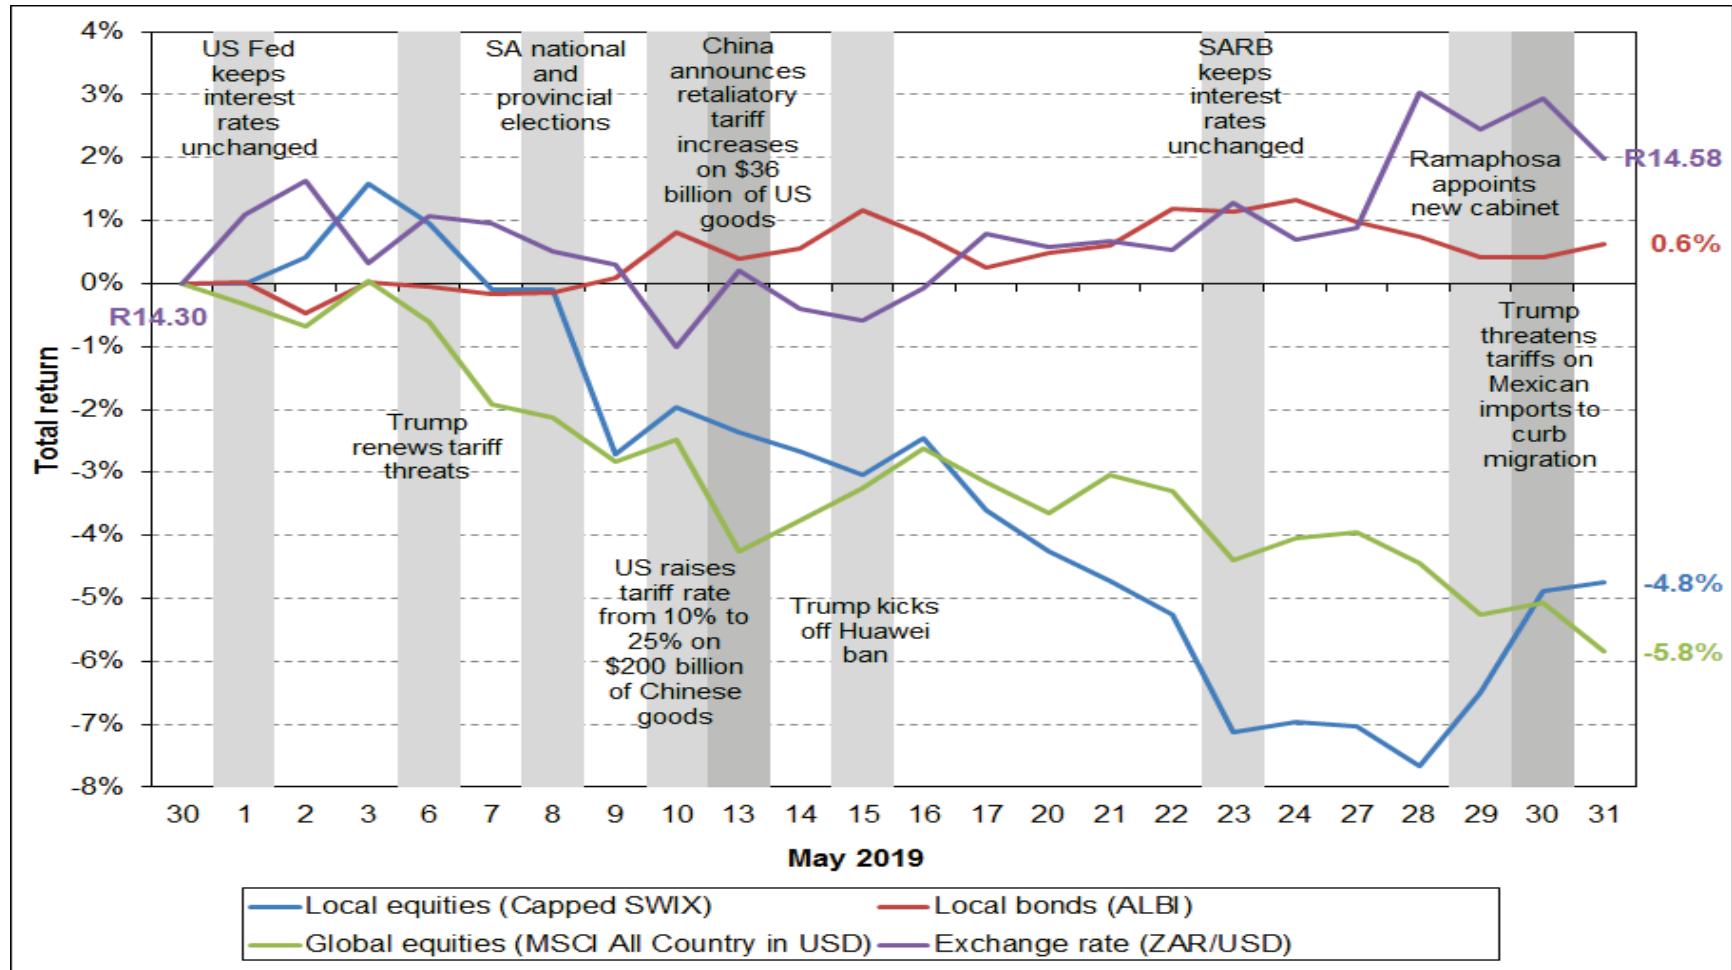

MONTHLY SNAPSHOT

NOTABLE EVENTS

- US President Donald Trump had a busy May, hiking tariffs on China, banning US companies from doing business with Chinese telecoms giant Huawei and threatening tariffs on Mexico in an effort to curb the flow of migrants. This unexpected deterioration in trade relations wreaked havoc on global equity markets and emerging markets in general, with the MSCI All Country Index losing 5.8% (in US Dollars) over the month.
- Against this backdrop the Rand weakened by 2% against the US Dollar, despite the largely market-friendly outcome of the 2019 SA national and provincial elections and the subsequent appointment of a slightly leaner and less controversial cabinet.
- The local equity market (Capped SWIX) was unsurprisingly also not able to escape unharmed, shedding 4.8% after trading as much as 8% down during the course of the month. All of the major sectors lost value, but Financials (-2.3%) and Listed Property (-0.9%) managed to do better than Resources (-5.1%) and Industrials (-6.0%).
- Year-to-date returns on the local equity market remain in positive territory (+4% to +7% depending on the index), but looks considerably less impressive than they did at the end of April (luckily May's losses have been mostly recovered by mid-June).
- The central banks of both the US and SA kept their policy interest rates unchanged at their May meetings. Statements from both these entities seem to indicate that the odds of interest rate *cuts* later this year have increased.
- First quarter local economic growth came in well below expectations, with the economy contracting by 3.2% on a seasonally adjusted and annualised basis, as load shedding took its toll on especially the mining and manufacturing industries. Following this disappointing news many institutions have downgraded their 2019 growth forecasts to below 1%.
- In other economic news SA's unemployment rate increased from 27.1% to 27.6% (and from 37% to 38% when discouraged job seekers are included), while business confidence (as measured by RMB/BER) remains depressed (staying constant at 28 index points, where the neutral level is 50).
- With very little positive news on the economic front, South African oenophiles would have had ample reason to partake in National Wine Day, which was held on the 25th of May. Slides 24 to 26 contain some interesting statistics on this popular beverage.

ASSET CLASS PERFORMANCE SHORT TERM

ASSET CLASS PERFORMANCE MEDIUM TO LONG TERM

ASSET CLASS PERFORMANCE REAL (EXCESS ABOVE INFLATION) RETURNS

MARKET PERFORMANCE

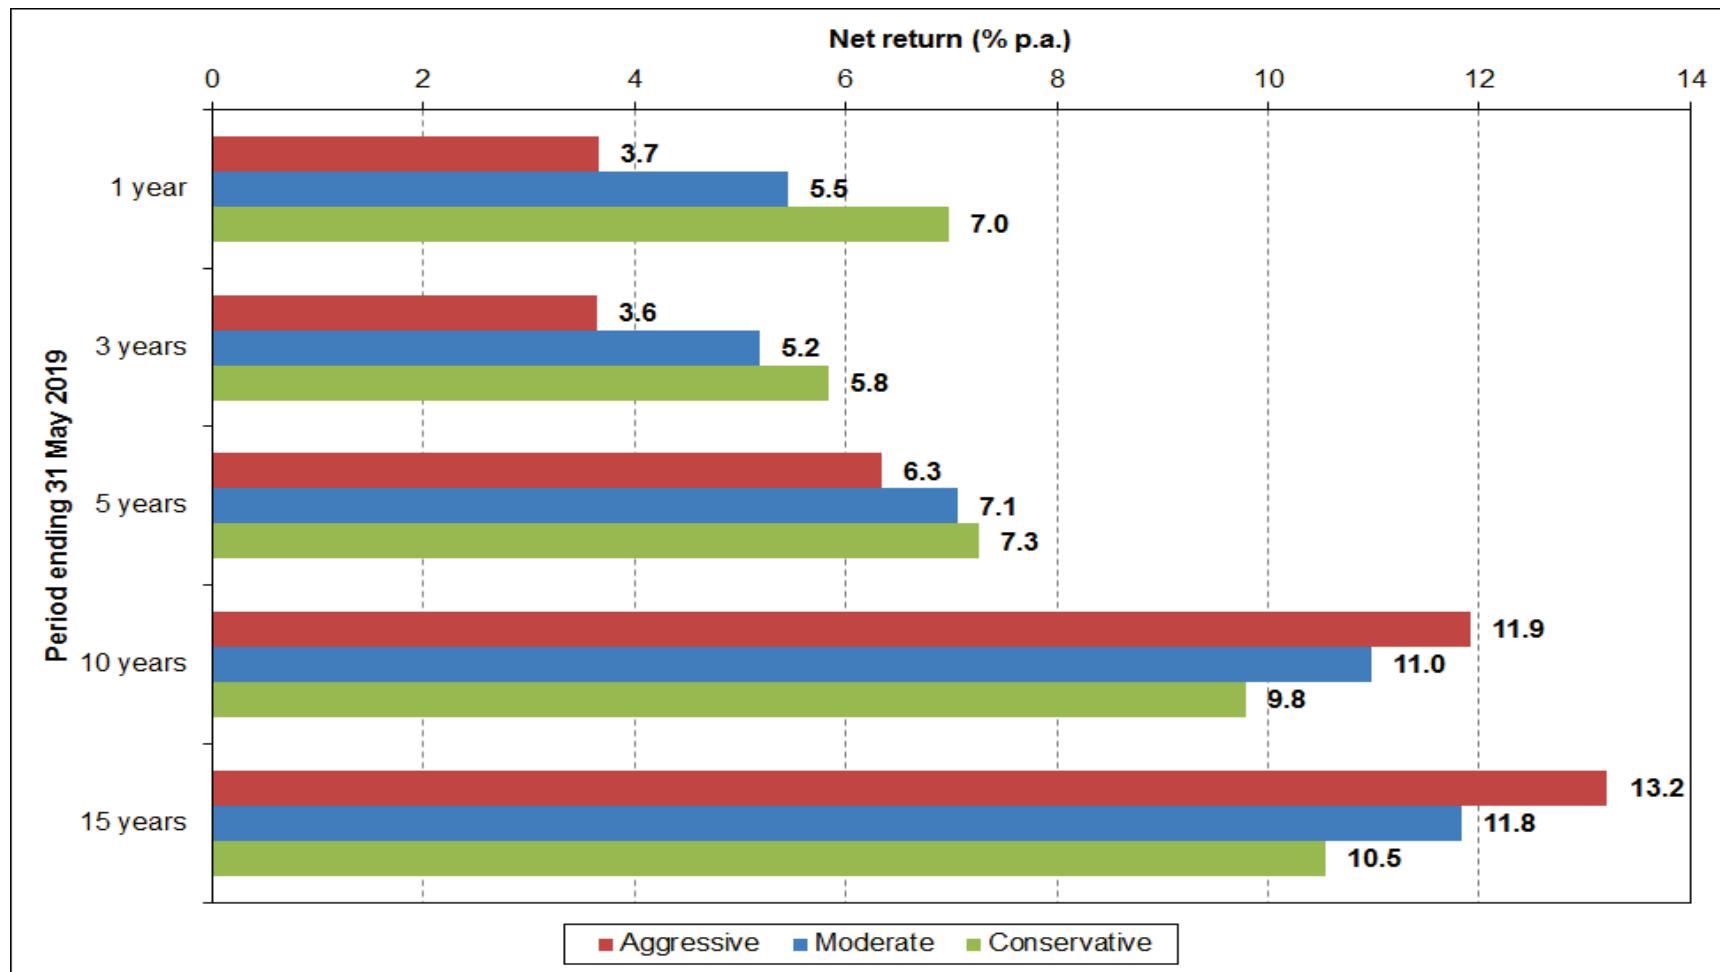

WHAT PAST RETURNS CAN INVESTORS REASONABLY EXPECT?

Given the performances of the various asset classes (see earlier slides), what level of returns (in both nominal and real terms) can investors reasonably expect from the market (see next two slides), assuming the following asset class allocations:

Asset class	Asset class allocation per risk profile		
	Aggressive	Moderate	Conservative
Local equities	60%	40%	25%
Global equities	15%	15%	10%
Total growth assets	75%	55%	35%
Local bonds	15%	25%	30%
Local cash	5%	15%	25%
Global bonds	5%	5%	10%
Total income assets	25%	45%	65%
TOTAL	100%	100%	100%
