## Notes

1. Returns for the investment options and the ASISA averages are shown net of investment management fees.
2. Returns for periods longer than 12 months have been annualised.
3. Please note that Acumen's actual returns were augmented with the underlying products' actual (or estimated, where applicable) net returns to give an indication of the longer term performance histories.
4. The Acumen umbrella funds' default strategy portfolios were officially opened in July 2019. The performance numbers for periods starting before this month therefore reflect the historic performance of the underlying managers (using the average of those underlying portfolios that were operational at the time).
